About me:

I am a hardworking individual and I am very passionate about software development. I am dedicated to all of my projects I work on and I strive to meet the deadlines given while meeting the needs of the client.

Work Experience:

Code Nation - October 2019 - Current

During this course I expanded my knowledge of coding and mastered some of my skills, I managed to complete all projects with plenty of time left and impressed the instructors. As-well as developing my coding abilities I have really grown my teamwork skills. I solved complex algorithms with javascript in the first week and I worked well on group projects.

Volunteer Scout Leader - 2014

As a young leader I was responsible for 10 - 15 young children. I would plan evenings and some trips for them as-well.

Skills:

Languages:

- JavaScript
