ABOUT ME

I am a hardworking, friendly and motivated individual and am willing to learn. I am looking to work in a setting that will allow me to use skills I have gained,work to a consistently high standard and to improve.

During my time at Code Nation I have been working on projects alone and in small and large groups. This has taught me how to work in an agile environment and how to manage working well in teams.

I have worked in an agile environment during my time at Code Nation using methods such as Kanban and Scrum to complete group projects.

EXPERIENCE

Digital Academy, Cambridge — *Junior Software Developer*

During my time at Code Nation I was been trained in a professional environment and have been working on live projects using Javascript, HTML, CSS, Java, C++ and SQL. I have taken on the leadership role of some projects I have worked on, I made sure everyone was on the same page and we got to the end result quickly and efficiently. I have furthered my teamwork, leadership and pitching skills, along side while having the routine and environment of a developer. I have also worked across campuses and this has improved my communication and team-working skills.

EDUCATION

Parkside, Cambridge— *GCSE*

September 2013 - September 2017

SKILLS

Javascript

Html & Css

C++

Java

MySql
